

Product Information

PureShield™

PureShield™ is the protection layer built into every MMCC® service. This sheet covers what it is, where it is used and how long it lasts.

What it is	MMCC's own cleaning and protection formula, used in every MMCC® valet. Developed in-house and exclusive to MMCC®.
Where it is used	Painted exterior surfaces.
How it is applied	Applied on site by your MMCC technician with a dedicated sprayer, then finished with a clean microfibre towel. No mains wash-water connection is normally required.
Protection period	Up to 1 month of water and rain-beading defence with the Basic and Full Valet. Up to 3 months with the Ultimate Valet.
Aftercare	Wash gently, by hand or touch-free, and avoid abrasive brushes. Dry with a clean microfibre towel.
Supply	Not sold separately. Available only through MMCC® services.

> Safety

The PureShield™ Safety Data Sheet is available as a PDF on the MMCC® Toolkit page. As applied, the mixture is not classified as hazardous.
