2 Scope and purpose

This assessment sets out the main hazards of our work, who could be affected and the controls we use. It is reviewed at least once a year, after any accident or near miss, and whenever equipment, products or methods change.

3 Hazards and controls

Hazard	Who may be harmed	Controls
Working around vehicles and traffic	Our team, clients, passers-by	Agree a safe working position with the client. Check the surroundings before starting. Never work in a traffic lane.
Chemical products	Our team, clients	Follow the COSHH Policy and the product's safety data sheet. Wear gloves and eye protection where required. Keep products closed and labelled.
Slips, trips and uneven ground	Our team, clients	Keep the work area tidy and cables and bags out of walkways. Wear suitable footwear. Wipe up spills at once.
Manual handling	Our team	Carry equipment within your own capability, split heavy loads and ask for help.
Cordless power tools and vacuums	Our team, clients	Use as the maker instructs and check before use. Do not use damaged equipment. Keep bystanders clear.

Fire and batteries	Our team, clients, property	Keep products and batteries away from heat. Charge batteries as the maker instructs.
Dust and awkward positions when working inside vehicles	Our team	Change position and take breaks. Use dust protection where dust is heavy.
Weather: heat, cold and sun	Our team	Wear suitable clothing, drink water and take breaks.
Working on client premises	Our team, clients	Report to the client on arrival where possible. Follow site rules. Carry a charged phone.
Accidents and near misses	Our team, clients	Give first aid, call 999 in an emergency, and report it to the responsible person.

4 Review

We review this assessment at least once a year, after any accident or near miss, and whenever equipment, products or methods change.
