MMCC® | Mobile Mint Car Care

Sustainability Report: fact sheet

Live figures as of 2 November 2026 at 23:30 (Europe/London). Source of record: https://mobilemintcarcare.com/sustainability-report

1,807
vehicles serviced since 2023

271,050 L
fresh water saved

257,498 L
wastewater and runoff avoided

95.95 kg
CO2e avoided (water only)

6.5 m
edge of a cube holding that water

Versus a normal wash

Indicator	Normal wash, per car	Avoided, per car	Avoided, all vehicles
Fresh water	**150 L**	**150 L**	**271,050 L**
Wastewater and runoff	**142.5 L**	**142.5 L**	**257,498 L**
CO2e (water supply and treatment)	**53.1 g**	**53.1 g**	**95.95 kg**

Method

- One live counter has recorded every vehicle serviced since 2023. All figures are that counter or calculated from it.
- Fresh water: each service replaces a normal wash, taken as 150 litres per car (US EPA WaterSense reports 114 to 170 litres for commercial car washes).
- Wastewater: water saved x 95%, the share that becomes wastewater in UK conversion factors.
- CO2e: water saved x 0.000354 kg per litre (UK Government DESNZ 2025: water supply plus wastewater treatment).

Limits

- The 150 litre reference is a standard comparison, not a measurement taken on each customer's driveway or at each car wash.
- The CO2e figure covers water supply and treatment only. The footprint of our products and packaging is not yet included, which is why it sits on the planned list.
- Avoided emissions are reported separately from your Scope 3 inventory and do not reduce it.
- These figures have not been independently assured. What we offer instead is the method, the live data and public proof of each service.

About MMCC

MMCC® | Mobile Mint Car Care protects vehicles where they are parked, in Surrey and London, every day from 8am to 8pm. Its waterless PureShield service replaces a conventional wash, and every service is publicly evidenced at @mmcc.day.
